Terry
                              · fairly immediate
· They design + coding on prototype
· underlying tech or working on structure
  of company, relationships

· High on design
· less high on code, but can do and like to
1 yr. long ended November   San diego
· 6-7 people group from so far
  Sr Architect, now of Twentieth Ted

        make sure its working

Boston
  law school + Next step dev company

        most fun
        wants to get back to

few 10-50 people

Next steps
· he waits 2 weeks until Europe friend returns
· yr / friend in Chicago

Darren Barker

- Elizabeth Hodge at Stanford
  ~~axess~~ project &
  use as reference
  did student tester ~~72 3226~~

Can do: prototype or quick build

Want to do: interact stff
        exciting, larger impact

finance: risks fine
    $60 base $15-20% bonus
        $400/mo vent

- Universal Metaservice

- orthogonal audio virtual reality

    Usage with audio across multiple services

    4 Economic model: Attention-based
    3 Nexus / metaservice
    2 Filtering / Querying
    1 Group Structure
Layer 0 User Indentity

Core Ideas

        Identity: UIDs
            pseudo Anonymous
            universal access
                    open / IETF

        Context
          - context ≈ place
          - set of UIDs

        Query RT Filtering "Buddy list" + alerts
